About Me

As a Full Stack Web Developer specialized in the Next.js, .NET, and TypeScript ecosystems, I have been developing e-commerce solutions for global marketplaces such as Amazon, eBay, Trendyol, and Hepsiburada since 2021. I develop scalable applications in multi-marketplace API integrations, workflow automation, and performance-oriented system architectures.

Work Experience

Full Stack Web Developer

01/2025 - 06/2026

Pronist Software and Consulting | Istanbul, Turkey

- As a Full Stack Developer, I developed comprehensive web applications using Next.js, .NET, SQL Server, and TypeScript by applying modern UI/UX principles.
- By taking a leading role in e-commerce marketplace integration projects, I successfully implemented API integrations for major platforms such as Amazon, Trendyol, and Hepsiburada and achieved 80% process optimization.
- By leveraging my previous e-commerce experience and marketplace platform knowledge, I provided technical leadership in integration projects; I guided the team in backend and frontend architectural decisions and personally carried out approximately 85% of the technical direction.
- I developed n8n integrations using Node.js to automate e-commerce workflows, including order processing and inventory synchronization; as a result, I reduced manual tasks by 70% and increased order fulfillment speed by 45%.
- Conducted comprehensive requirements analysis and user-focused design decisions to develop a CRM project using Next.js; completed 85% of the frontend implementation, achieved 100% integration with the .NET backend, and delivered a production-ready, reliable solution with 90% overall project stability.
- Worked with cross-functional teams in an Agile/Scrum environment, participating in sprint planning, daily stand-ups, sprint reviews, and retrospectives.

Intern/ Backend Web Developer

08/2023 - 10/2023

Yıldız Technical University / Information Technologies and Cyber Security Unit | Istanbul, Turkey

- I developed a multi-layered web application architecture using the .NET Core Identity Framework; I implemented comprehensive user authentication and authorization systems with strong security mechanisms.
- I designed custom role-based and claim-based authorization strategies to dynamically manage user roles and permissions; I implemented JWT (JSON Web Token)-based authentication to establish a secure and scalable identity management infrastructure.

Education

Biruni University/ Istanbul, Turkey

10/2020 - 06/2024
